

Creating Cool Web Sites with HTML, XHTML, and CSS

Walks readers through the process of creating a basic Web site from scratch using HTML, the basis for billions of Web pages, and then jazzing it up with advanced techniques from the authors award-winning sites. This updated edition features new material that shows readers how to attract visitors to a site and keep them there, including new JavaScript examples and coverage of cascading style sheets and XHTML, technologies that make building successful Web sites even easier. Also features exciting new tips and tricks for beginning and advanced users, as well as more expanded examples and samples for users to incorporate in their own sites. The book moves from basic design and deployment to advanced page layout strategies, showing how to spice up new or existing sites with sound, video, and animation.
