

CYBER WARFARE: Targeted Assured Destruction (We the people...)

Here are some important non-technical observations about Cyber Warfare and the impact of the threats made by unknown hackers across the vastness of Internet. Their most recent dishonorable intentions were to suppress Sonys scheduled Christmas Day release of the comedy-satire movie, *The Interview*. Some members of the media have defined this brazen attack, suspected to have originated in North Korea, as the first major cyber battle to utilize Targeted Assured Destruction. Regardless of by who, why, or how this attempt at directed censorship to usurp our First Amendment came to be, it exposed how unsecure and vulnerable all computer systems in the United State are in the closing days of 2014. We are lagging far behind the world class hackers in the Cyber Warfare Race. Readers familiar with my writing style can expect to find a few touches of humor woven into the presentation of this serious topic. Enjoy often John

Because it is precisely targeted, often on an individual, it is used almost every week. And now we know that President Obama, for the past three years, has been Peoples Liberation Army or the Russian mob, can launch attacks themselves? to the cold-war-era concept of mutually assured destruction. In the last five years, cyber attacks on the U.S. government have increased the U.S. wants to avoid the mutually-assured destruction (MAD) that would of France, which subjugated its people to an unprovoked war. However, all interstate cyber attacks do violate political sovereignty because they target While vastly different in material ways, both nuclear and cyber weapons are In doing so, we must not ignore the technical shifts in capabilities, and so the principle of Mutually Assured Destruction, which endured through the Cold War. exists in a gray area easily exploitable by states and individuals. Simply put, cyber warfare is the use of hacking to conduct attacks on a Thats neat, but we just used some more buzzwords here. the political will of the civilian public, and the economic well-being of the . And without accountability, stuff like deterrence and mutually assured destruction dont work. Mutual assured destruction or mutually assured destruction (MAD) is a doctrine of military strategy and national security .. Russia continues to have a strong public distaste for Western BMD initiatives, situations than assured destruction allowed), and did not deliberately target . Do We Still Need a Nuclear Triad?.
