

Gender Mainstreaming in Information and Communications: A Reference Manual for Governments and Other Stakeholders (Gender Management System Series)

Explores the major gender issues in media and communications, including both the public and private sector. Examines gender issues and offers recommendations in various areas of the media including: the media market, female/male media audience, image and portrayal of women and men, editorial policy, gender-sensitive language, media and violence, employment patterns, training, research. Bar charts show the proportion of female/male journalists in main subject areas by region; and the presence of women/men in newspapers, radio and television by region. Provides models of good practice; tools and guidelines for policy making, the institutional environment, and media companies; and lists of womens media associations and networks.
